

RAUNAK SHARMA

AI-PILOT SOFTWARE ENGINEER

📍 Bhopal, India • 📧 raunaksharma88630mt@gmail.com • 🌐 Portfolio • 🐙 GitHub • 🔗 LinkedIn

PROFESSIONAL SUMMARY

Highly efficient **AI-Pilot Full-Stack Developer** and Computer Science student at **LNCTS Bhopal**. Specializes in leveraging state-of-the-art Large Language Models (LLMs) and Generative AI workflows to rapidly design, construct, and debug complex full-stack applications. Proven capability of shipping 17+ interactive projects (Full-Stack, Java Systems, and Custom UI Synthesizers) by blending strong core coding fundamentals (JavaScript, Java, SQL) with advanced AI-assisted engineering prompts and automated developer environments.

EDUCATION

Lakshmi Narain College of Technology & Science (LNCTS)

B.Tech in Computer Science & Engineering • Bhopal, India
Graduation: 2027 (Expected) • Current GPA Focus: Data Structures, OOP, SQL Databases

TECHNICAL SKILLS & AI TOOLKIT

AI & Prompting: LLM Orchestration (Gemini, Claude, GPT), Prompt Patterns, AI Agent Workflows

Languages: JavaScript (ES6+), Java, Python, SQL, HTML5, CSS3

Frameworks: React.js, Node.js, Express.js, FastAPI

Databases & Tools: PostgreSQL, MongoDB, Git, Postman, Playwright

FEATURED PROJECTS

HostelBuddy — AI-Accelerated Discovery Platform

React • Node.js • MongoDB • Express

- Leveraged AI coding environments to accelerate development cycles, shipping a complete PG & Hostel matching engine in under 3 weeks.
- Constructed relational database models mapping property amenities, gender preferences, and budget ranges.
- Designed a verified administrative control pipeline enabling property authentication and secure lead generation reports.

AURA — Perfume Customizer & Olfactory Synthesizer

JavaScript • Canvas API • Web Audio API

- Designed an olfactory synthesizer mapping luxury perfume ingredients (Amber, Bergamot, Musk) to specific audio resonance waves.
- Programmed a custom rendering interface using the HTML5 Canvas API displaying collar styles and glass tint gradients.
- Leveraged LLM logic patterns to formulate olfactory-to-frequency translation algorithms.

Interactive Dev Console (Portfolio Shell)

React • CSS Keyframes • Command Shell

- Created a floating monospace developer console widget supporting tab auto-completion and arrow key command history.
- Implemented layout features including neofetch specs readouts, theme controllers, and locate scrolls.

CERTIFICATIONS & TRAINING

TCS & Tata Group — Generative AI Experience

Studied prompting models, LLM parameters, and enterprise AI automation flows.

AWS Academy — Cloud Foundations

Acquired training on AWS core infrastructure (EC2, S3, RDS) and cloud security.

JPMorgan Chase — Software Engineering

Completed project scenarios testing software engineering tools and logic flows.

Commonwealth Bank — Cybersecurity

Studied key patterns in secure coding, threat modeling, and encryption models.
